Thanks, Dan. Your voice mail clarified my confusion.

One further question: Is the newly discovered RIM within the footprint of the currently closed Bridgeton Landfill North Quarry?

**Subject:** Confusion about Elected Official Briefing vs. Tonight's CAG Presentation

Dan,

I'm trying to clarify my confusion. In the last bullet point on the bottom of the 1<sup>st</sup> page of the Elected Official Briefing document (attached):

"2.) the entire survey area remains within a secured portion of the site closed to public access."

At tonight's presentation I understood that the newly discovered RIM was outside the Area 1 fence, which seems to contradict the Elected Official Briefing document. Can you please clarify?

Thanks for your help & for your answers tonight re Chicago Heights.

Mike
